MUHAMMAD TARIQ

Certified Mud Logger & Well Site Geologist

Karachi, Pakistan +92-312-8716558 tariq.mayari@outlook.com LinkedIn

PROFESSIONAL PROFILE

Results-driven Mud Logger with 4+ years of comprehensive well site experience and advanced geological qualifications. Expertise in real-time drilling surveillance, formation evaluation, and hydrocarbon detection. Proven ability to enhance drilling efficiency through meticulous data analysis, proactive hazard identification, and precise geological reporting. Seeking to contribute technical proficiency in mud logging operations within a dynamic exploration environment.

ACADEMIC QUALIFICATIONS

- **Master of Science in Geology**
  University of Karachi, Pakistan **Jan, 2021 - Dec, 2021**
  Field(s) of study: Geology — Percentage: 61% — 1st Division — Level in EQF: 7 — 120 ECTS
  Specialized in petroleum exploration Techniques, Well logging Techniques and Soil mechanics.

- **Bachelor of Science (Honors) in Geology**
  University of Karachi, Pakistan **Jan, 2018 - Dec, 2020**
  Field(s) of study: Geology — Percentage: 58% — 2nd Division — Level in EQF: 6 — 180 ECTS
  Major Foucus: Core curriculum included stratigraphy, structural geology, and geophysical methods.

- **Intermediate (HSSC) in Science**
  F.G Boys Inter College Dr. Daud Pota Road Karachi **Oct, 2015 – May, 2017**
  Field(s) of study: Pre-Engineering — Percentage: 64% — Grade: B — EQF Level: 4
  Major Subjects: Physics, Chemistry, Mathematics & English

- **Matriculation (SSC) in Science**
  Education Trust Nasra Secondary School Karachi **Apr, 2013 – Mar, 2015**
  Field(s) of study: Science — Percentage: 73%— Grade: A — EQF Level: 3
  Major Subjects: Physics, Chemistry, Mathematics, Biology & English

PROFESSIONAL EXPERIENCE

Mud Logger / Wellsite Geologist **December 2023 – Present**
Petroservice GmbH — Oil & Gas Services Division, Pakistan

- **Monitored real-time drilling parameters (ROP, WOB, RPM, SPP) to optimize operations and detect formation changes.**
- **Conducted detailed lithological analysis of cuttings and performed hydrocarbon show evaluation via fluorescence and cut tests.**
- **Operated gas detection systems (total gas and chromatograph C1–C5) to identify pay zones and assess reservoir potential.**
- **Applied lag time corrections for accurate depth correlation between samples and down-hole formations.**
- **Maintained and calibrated rig sensors (gas traps, flow meters, pit indicators) to ensure data accuracy.**
- **Identified drilling hazards (kicks, losses, overpressure) and provided immediate alerts to drilling personnel.**

- **Compiled comprehensive Master Mud Logs integrating geological and engineering data.**
- **Prepared daily and final well reports summarizing geological findings and drilling performance.**
- **Communicated critical formation markers to support casing point and TD decisions.**
- **Enforced HSE protocols including H2S monitoring and hazardous material handling.**
- **Coordinated sample collection and distribution for third-party laboratories and government regulatory bodies.**

Trainee Mud Logger / Junior Geologist **March 2022 – December 2023**
Petroservice GmbH — Field Operations Division, Pakistan

- **Sample Collection & Processing:** Systematically collect geological samples at predetermined intervals from shale shakers and desanders
- **Lithological Analysis:** Perform microscopic examination of cuttings, describe texture, grain size, sorting, and roundness under supervision
- **Data Recording:** Assist in maintaining accurate depth correlation between drilling parameters and sample depths
- **Equipment Operation:** Gain proficiency in operating mud logging sensors, gas traps, and chromatographic analyzers
- **Safety Compliance:** Participate in rig safety meetings, JSA reviews, and implement permit-to-work procedures
- **Report Preparation Support:** Contribute to geological data compilation for daily and weekly operational reports

TECHNICAL EXPERTISE

- **Mud Logging Operations:** Comprehensive well site geology, cuttings description, gas logging, drilling parameter monitoring
- **Formation Evaluation:** Lithology identification, porosity estimation, hydrocarbon show evaluation, correlation techniques
- **Drilling Optimization:** Drilling efficiency analysis, problem detection (stuck pipe, lost circulation), pore pressure prediction support
- **Safety Systems:** H2S monitoring, gas detection protocols, emergency response procedures, hazard identification
- **Software Proficiency:** Mud logging software systems, geological data management, Microsoft Office Suite, ArcGIS
- **Reporting Standards:** API reporting guidelines, wellsite documentation, regulatory compliance documentation

PROFESSIONAL CERTIFICATIONS & TRAINING

- **IWCF Level 1 (International Well Control Forum)** – Well control principles and kick detection
- **H2S Safety Certification** – Sour gas handling, detection methods, and emergency response (Rutledge, Pakistan)
- **Fire Fighting & Advanced First Aid** – Rig emergency response and medical management
- **Mud Logging Certification Program** – Petroservice GmbH comprehensive training:
  - Basic & Advanced Mud Logging Principles

  - Online & Offline Data Acquisition Systems
  - Sample Description & Geological Interpretation
  - Technical Report Writing & Documentation
- **Well Logging & Formation Evaluation Workshop** – Department of Geology, University of Karachi
- **ArcGIS for Petroleum Geologists** – Spatial data analysis and mapping applications
- **Health, Safety & Environment (HSE) Compliance** – Industry best practices and regulations
- **Permit to Work System & Risk Assessment** – Control of work procedures and JSA implementation

ACHIEVEMENTS & PROFESSIONAL RECOGNITION

- **Gold Medalist – Imperial Barrel Award 2022**
- *American Association of Petroleum Geologists (AAPG)*
- Recognized for excellence in basin analysis, prospect evaluation, and technical presentation
- **2nd Place – Imperial Barrel Award 2022 (Asia Pacific Region)**
- *American Association of Petroleum Geologists (AAPG)*
- Competed against top geological teams across Asia Pacific in petroleum exploration challenge
- **Professional Development:**
  - Successfully transitioned from Trainee to Certified Mud Logger within first year, demonstrating rapid technical competency acquisition

PROFESSIONAL ATTRIBUTES

- **Analytical Mindset:** Strong data interpretation skills with attention to detail in geological observations
- **Safety-First Approach:** Committed to maintaining highest safety standards in hazardous environments
- **Technical Proficiency:** Quick adaptation to new technologies and logging equipment
- **Communication Skills:** Clear reporting of technical information to multidisciplinary teams
- **Problem-Solving Ability:** Proactive identification and resolution of operational challenges
- **Team Collaboration:** Effective coordination with drilling engineers, geologists, and rig personnel
